Creative Solutions for Any Project

Spec-Rite Designs is North America's leading fabricator of solid phenolic furnishings and remains one of the oldest and most recognized manufacturers in the United States. Our team of experts in product design, construction and precision CNC technology support the tightest tolerances and exceed the standards of quality and consistency that architects, designers and specifiers have come to expect. Through an exclusive partnership with Prospec US, European styling and creative finishes have allowed Spec-Rite Designs to offer the latest in design trends.

Locker Systems

Spec-Rite Designs offers a wide range of lockers suitable for dry or wet areas with many style and configuration choices. Choose from our Marathon Phenolic Locker System featuring aluminum base units and phenolic doors, or choose our Marathon Glass Door Locker System for a unique design look. Our exclusive Design-Tec® Solid Phenolic Locker System uses environmentally friendly phenolic material that stands the test of time and provides a non-microbial, low maintenance solution. Design-Tec® Lockers feature stainless steel hardware standard and an abundance of color choices allow for limitless possibilities. Our lockers are perfect for indoor and outdoor swimming facilities, water parks, hospitals, schools, stadiums, military bases, and government and recreation centers.

DesignLine® Cabinets

DesignLine Cabinets are the ultimate solution for the busy workplace. These custom modular cabinets are shipped fully assembled, drastically reducing set-up and installation time. To make your life even easier, DesignLine Cabinets are available in numerous colors and textures and are easy to maintain.

Featuring one of the most hygienic surfaces in the marketplace, DesignLine Cabinets are moisture-resistant to prevent the growth of mold and fungi. This environmentally friendly phenolic cabinet is right at home in skilled nursing facilities, laboratories, universities, hospitals, and schools.

Durable Designs® Furniture

Our creative and sustainable furnishing line mixes style, originality and flexibility using environmentally friendly phenolic surfaces and stainless steel hardware. Sleek modern designs, bold color options, and complete customization capabilities make Durable Designs® phenolic furniture one-of-a-kind in the solid phenolic furniture market. Each item can be tailored to fit your unique application and provide a virtually maintenance free hygienic solution for years to come.

Partition Systems

Flexible styling and a variety of core options enable Spec-Rite Designs to cover the commercial interior partition market. Available in attractive finishes, patterns and colors, our partitions offer exceptional durability while reducing maintenance and repair time. Exclusively manufactured and distributed, Prospec and DesignRite® Partitions represent a wide assortment from basic modular units to European-styled solid phenolic and glass designs. Value-added features like stainless steel hardware are the standard to ensure that every DesignRite® solid phenolic partition system will uphold its superior look and function for years to come. Our flexible and versatile systems are ideal for schools, hospitals, recreation and fitness centers, spas, restaurants, hotels and resorts, airports, and casinos...anywhere the public goes!

durable

versatile

Laboratory and Work Tops

For over 50 years, our strong commitment to solid craftsmanship has made us an industry leader in fabricating high-quality laboratory and work surface tops. Our surfaces are non-reflective and resistant to chemicals, scratches, and stains. Used widely in Biological, Chemical, Clinical, and Physical laboratories, we fabricate the material to your specifications, accommodating for edge details, sinks, fixtures, pegboards, and other design elements.

These durable, fabricated work tops are guaranteed not to rot or delaminate. This line's variety, convenience, and quality are highlighted by our ability to retrofit tops for restaurants, schools, hospitals, hotels, recreation centers, and more.

Gecko® Wall Systems

The exclusive Gecko™ Wall System installs faster than any other complete phenolic wall panel system and reduces labor costs by at least 40%. Gecko's non-porous, non-microbial solid phenolic wall panels are Greenguard® certified and help prevent the growth of bacteria, making them ideal for healthcare, wellness centers and public transportation.

Facilities maintenance personnel will be impressed by Gecko's incredible performance and users will be impressed with the depth and vitality the system can add to any space. Whether you are designing an entire building, one room, a feature wall or decorative accents, Spec-Rite Designs can furnish a complete phenolic wall panel system that will withstand repeated cleaning while retaining its beauty and integrity for years to come.

resilient

The Environment and Sustainability

We recognize the tremendous impact product manufacturers have on the environment, so we pledge to be environmentally responsible throughout our production process with the following efforts:

- Selecting only environmentally friendly manufactured products
- Using locally harvested/extracted/produced materials and hardware when possible
- Batching shipments to reduce transportation-related pollution and energy use
- Optimizing material usage and reusing/repurposing scrap material when possible
- Actively supporting and participating in LEED® project certification
- Maintaining LEED accredited professional(s) on staff

sustainable

Who We Are

Spec-Rite Designs is committed to a higher standard of quality that ensures successful, on-time delivery and complete customer satisfaction. Our experienced team of estimators, engineers, designers and fabrication specialists pay attention to even the smallest of details, on every project, from conception through installation.

Product Description

Flexible styling and creative configurations...that's what makes DesignRite partition systems the most valuable contribution to any room design. These environmentally friendly partitions will add a unique flair to your next commercial design project. Customizable doors and panels, coupled with an extensive color selection, allow you to coordinate the partitions with any of our other product lines.

Features and Benefits

Features	Advantages and Potential Benefits
Solid Phenolic Construction	Durable. Impact- and water-resistant. Custom design engineering available.
Non-Microbial	Will not support bacterial growth.
Other Benefits	Contributes to LEED® certification program, panel material is Greenguard® certified, moisture-resistant, will not warp or delaminate, graffiti-resistant, and impact- and scratch-resistant.
Hardware	Stainless Steel
Partition Layouts	Alcove, Corner Unit, Free Standing, Handicap Corner, and Wall to Wall
Partition Styles	Floor Mounted Overhead Braced, Floor to Ceiling Braced, Ceiling Hung, and Floor Anchored
Urinal Screen Layouts	Wall Supported, Designer Floor Anchored, Floor Post to Ceiling Braced, and Standard Floor Anchored
Numerous Colors Available	Visit www.specritedesigns.com for our current selection.
Warranty	Phenolic material is warranted for a period of ten (10) years from date of purchase to not delaminate or warp. Spec-Rite Designs, LLC, warrants its products to be free from defects in workmanship for a period of two (2) years from the date of purchase when properly stored, handled, installed, and maintained under normal use.

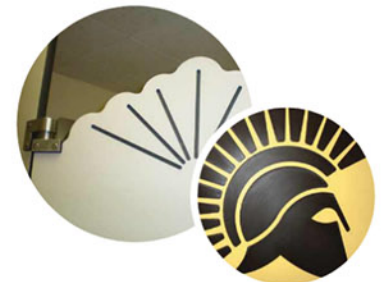

Applications

Our flexible and versatile partition systems are ideal for:

- Schools
- Hospitals
- Recreation Centers
- Spas
- Military Bases
- Health and Athletic Facilities
- Public Facilities
- And More...

Customization

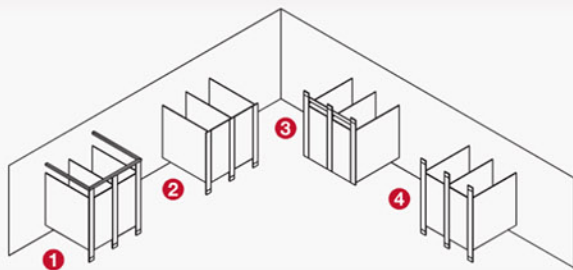

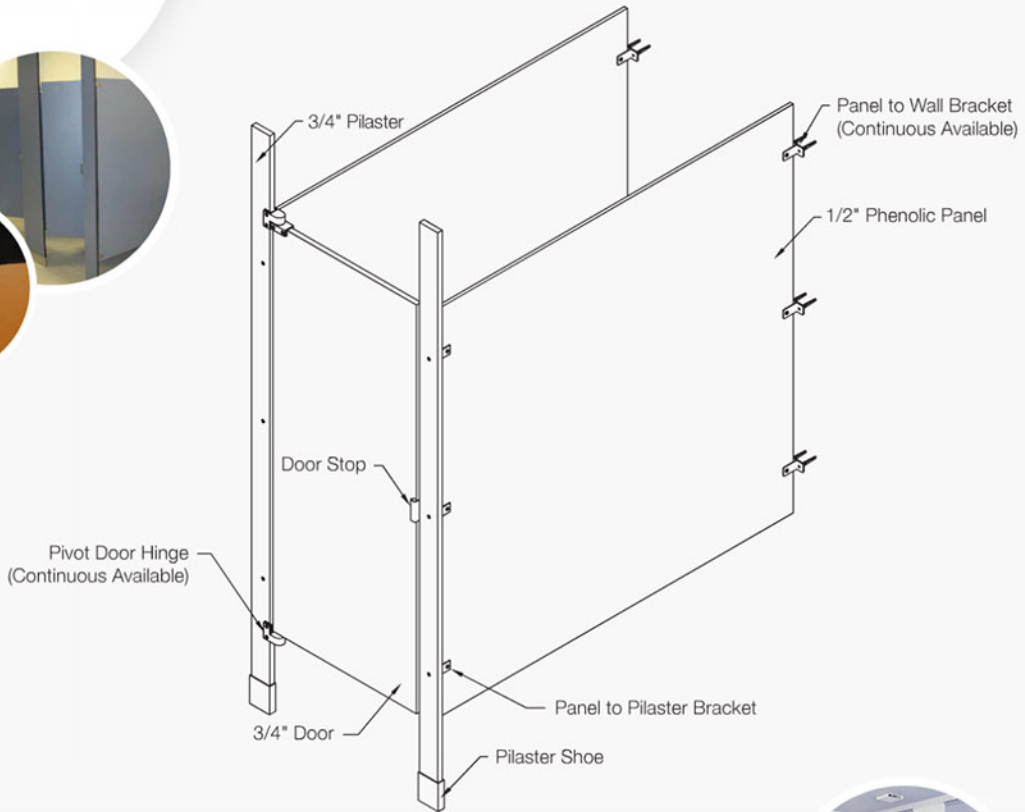

Combining in-house CNC technology with our unparalleled design capabilities allows us to customize any project. We're able to router logos, images, or graphics into the phenolic surface with incredible accuracy and consistency. This unique yet affordable option creates a one-of-a-kind product tailored specifically to your application.

Design-Tec® Lockers

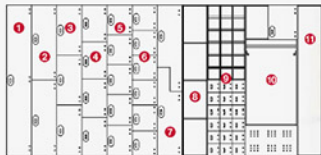

Flexible Options for Design Freedom

An extensive array of accessories, additional features, and customization are available to complement your Design-Tec Lockers and to provide a complete installation.

Design-Tec Lockers are engineered to exceed rigorous demands and built to stand the test of time. Constructed entirely of solid phenolic, our lockers are not only aesthetically superior but are guaranteed to withstand aggressive use in almost any environment. Phenolic material provides excellent non-microbial properties, is highly scratch- and graffiti-resistant, and is impervious to water. With hundreds of color and pattern options, Design-Tec Lockers are sure to complement any space and provide an attractive storage solution.

Design-Tec Lockers are available in countless standard and custom sizes and configurations to meet the varying needs of designers and architects. Our design team will work one-on-one to create your perfect custom solution.

Innovative Attachment Systems | Durable Phenolic Panels

Spec-Rite Designs is the exclusive manufacturing and distribution partner for Gecko Wall Systems in the United States. Combining superior fabrication capabilities with creative hardware designs to provide durable, low-cost solutions to the wall lining market.

Interior Wall Lining Systems

Overview of Attachment Systems

Spec-Rite Designs is pleased to offer solid phenolic wall covering available with various attachment systems. Each phenolic panel can be customized for your unique application and comes with our standard 15-year warranty. To discuss design, color and fastening options on your next wall lining project, please feel free to contact any member of our design team at 314.633.4978 or info@specritedesigns.com.

Clip & Rail System

The clip and rail system is one of the most commonly used concealed fastening systems in the industry today. Durable mounting hardware and the vast palette of phenolic finish options compliment this easy-to-install option.

System Capabilities:

- Concealed attachment
- Any panel size or shape
- Extremely versatile
- Safe and hygienic
- Non-microbial system & panels

Exposed Fastening System

Solid phenolic panels are thru bolted either to a support system or directly into the wall using stainless steel fasteners allowing for maximum design freedom.

System Capabilities:

- Concealed attachment
- Any panel size or shape
- Extremely versatile
- Safe and hygienic
- Non-microbial system & panels

GECKO™ WALL SYSTEM

The patent pending GECKO system is both modular and easy-to-install requiring as few as three components. Each panel on this zero lift-off system is individually demountable and will fit with any molding scheme. GECKO is a dimensional floating

System Capabilities:

- Zero lift-off
- Any panel width (up to 40 SF total)
- Up to 10' wall heights
- Fits any molding scheme
- Quick & easy installation
- Controlled movement & alignment
- Air circulates behind panels
- No exposed fasteners
- Appearance retention
- Non-microbial system & panels

GECKO-PRO™

Gecko-PRO is a perimeter rail system with the appearance and style of a traditional clip and rail system without the hassle of clips or panel drilling. Panels have a perimeter dado which drop into screw mounted moldings for fast fabrication and easy installation. System Capabilities Progressive installation No clips No drilling Minimal components Quick and easy installation Accommodates panels up to 5' x 5' Low-cost attachment system No exposed fasteners
