Focused on Service™

In order to ensure that AJW is operating with your needs as our top priority, I have devoted a significant amount of time over the last two years visiting distributors like you.

One of my primary objectives for these visits has been to understand which qualities make a partner valuable to you and which behaviors force you to re-evaluate or terminate a business relationship. The partners who you classified as unreliable, difficult, and more expensive to do business with were not only taxing on your business and your staff, but also detrimental to your relationships with your customers and your bottom line. Your point was very clear: these partners failed because they complicated your operations instead of simplifying them. On the other hand, I learned that a partner who exceeds your expectations by providing you with consistent service levels and most importantly, expedient conflict resolution, can quickly distinguish themselves as an invaluable resource.

Armed with a better understanding of your daily challenges and needs, we have renewed our focus to improve our ability to deliver quality products at competitive prices with superior service. A core group of industry veterans along with a team of motivated newcomers create a winning formula that allows us to concentrate on the fundamentals that make your project successful. Our culture at AJW is the foundation of our performance. Focused on Service is more than a tagline; it's a way of doing business for every employee at AJW.

The positive momentum we have created at AJW is the result of your continued feedback. Our service model, manufacturing standards, and performance guidelines are designed to deliver results for you. We invite you to share your requests, comments, and questions about any aspect of our business. This interactive dialogue will ensure that AJW continues to provide you with the best results in the industry.

We look forward to building a successful partnership with you.

Sincerely,

Chris Hansen, CEO

CORPORATE RESPONSIBILITY

At AJW our proactive business approach includes awareness of social and environmental responsibility. As a company with a global customer base, we understand that the way we act and the products we sell have the potential to impact the world. Responsible corporate citizenship means more to us than just positive public relations. It is a way of doing business, and of helping others to follow suit. We set a high standard of social and environmental performance for ourselves, and encourage our business partners and others in our industry to do the same.

USGBC Member

AJW is a proud member of the United States Green Building Council (USGBC), a non-profit organization committed to creating a prosperous and sustainable future for our nation through cost-efficient and energy-saving green buildings.

Membership in this organization is made up of organizations and individuals who share the USGBC goal of a sustainable future. As a partner in construction, AJW believes that it is our duty to help push the green building industry forward.

About LEED

Leadership in Energy and Environmental Design (LEED) is an internationally recognized green building certification system that provides third party verification that a building project was designed with environmentally-safe goals in mind.

Developed by the United States Green Building Council, LEED provides straightforward guidelines for recognizing and executing green solutions for design and construction. Any building, no matter how large or small, may be LEED certified.

AJW Products Can Help

As intimidating as LEED certification may seem, we know that a little extra help goes a long way. That's why the AJW collection includes recycled, sustainable, and energy-efficient products that fall within the LEED guidelines to earn you points.

Sourced Material:
Stainless steel must be sourced within a 500 mile radius of our factory (original source Pittsburgh, PA). Many of our stainless steel products will help with your eligibility toward Material and Resource (MR) Credits 5.1 and 5.2 if your project is within 500 miles of New Windsor, New York and Pittsburgh, Pennsylvania.

Raw material:
AJW stainless steel products are made up of between 55% and 65% recycled material. Thirty-five percent of our stainless steel is recycled pre-consumer and 25% is recycled post-consumer. Our stainless steel will help with your eligibility toward MR Credits 4.1 and 4.2.

Plastics:
All plastic AJW baby changing stations are made up of 50% recycled high density polyethylene. AJW HD plastic retractable shower seat decks are made from 100% post-consumer high density polyethylene. Our plastic materials will help with your eligibility toward MR Credits 4.1 and 4.2.

Packaging:
Our corrugated cardboard packaging is made up of 87% post-consumer recycled material.

Glass:
Pre-consumer materials include scraps that are left after the fabrication process. We use these materials in the glass for our mirrors, cutting down on waste. All glass used in AJW mirrors are made up of 20% pre-consumer recycled materials.

Focused on Solutions™

Sometimes your building project presents a problem that standard products won't solve. When faced with this challenge, turn to AJW for assistance with finding the right solution.

With over 40 years of manufacturing experience, AJW is your full service partner for every aspect of your washroom accessory needs. From bid to delivery, AJW will work with you to design and implement solutions that fit within your budget and time constraints.

If your project requires a special fabrication, please contact one of our Customer Relationship Managers at **845.562.3332** for more information about how AJW can turn your problem into a solution.

Care & Cleaning

Proper care and cleaning is important to maintaining the longevity of your products. See the guide below for information.

Soap Dispensers:
Tanks and valves should be cleaned periodically to avoid sludge build up, thus promoting better valve operation. If a dispenser valve becomes clogged, the unit should be soaked in hot water and the valve should be flushed. We recommend free flowing viscosity soaps only that are non-chloric and mixed properly per soap manufacturer's instructions.

Cabinets and Grab Bars:
Clean with non-abrasive cleaners and wipe with a soft cloth, following the grain of the steel to prevent scratching. Chloric solutions can discolor stainless steel and eventually cause oxidation.

Mirrors:
Plate, tempered and laminated glass should be maintained the same as stainless steel. Do not let cleaning solutions collect inside mirror frame, as this may cause silver spoilage.

Security Mirrors:
Plastic and stainless steel surfaces should be cleaned with non-abrasive cleaners. Cleaners containing bleach, chlorine, or other harsh chemicals should not be used. **Do Not** clean security mirrors in circular motions, as this will scratch the mirror surface.

Hand Dryers:
Preventative maintenance should be periodically performed to ensure proper mechanical function. The power source must be interrupted and cover removed. Any dust or lint should be removed from inside the cover and internal mechanism. Secure cover back to base, restore power and test dryer for proper operation. All electronic eyes must be carefully cleaned of grease and checked for obstructions that may impede the performance of the sensor range.

ADA Guidelines

The landmark Americans with Disabilities Act (ADA Code), enacted on July 26th, 1990, provides comprehensive civil rights protections to individuals with disabilities in the areas of employment, public accommodations, state and local government services and telecommunications. This rule prohibits discrimination on the basis of disability by private entities in places of public accommodation, and requires that all new places of public accommodation and commercial facilities be designed and constructed so as to be readily accessible to and usable by persons with disabilities.

Note: Be sure to check all local codes before the product is installed for any deviation in mounting requirements.

This icon denotes that the item is ideal for ADA applications.

ADA Compliance Guide

4.19.6 – Mirrors:
Bottom edge of reflective surface, cannot be mounted at a height higher than 40" above finished floor. If mirrors are to be used by both ambulatory and wheelchair users, mirrors must be at least 74" (1880mm) high at their highest edge. A single full length mirror can accommodate all people including children.

4.27.4 – Operation:
Controls and other operating mechanisms shall be operable with one hand and shall not require tight grasping or twisting of the wrist. The force required to activate controls shall not be greater than 5 lbs. Highest operating point of an item can be no higher than 40" above finished floor.

4.26.3 – Grab Bars:
Diameter of gripping surface shall be 1 1/4" to 1 1/2" (32mm to 38mm). The space between wall and grab bar (offset) shall be no greater than 1 1/2" (38mm). Recommend 33" to 36" centerline above finished floor. Verify if a non-slip (peened) grip is required per local codes.

4.16.6 – Toilet Paper Dispensers:
Any dispenser that needs to comply with ADA code cannot have any type of controlled delivery. The minimum mounting height above finished floor is 19" to the center of the roll.

4.23.9 – Medicine Cabinets:
Must be located with a usable shelf no higher than 44" (1117mm) above the finished floor.

4.21.3 – Shower Seats:
Seating area of the shower seat should be at a height between 17" to 19" above the finished floor.

4.20.3, 4.26.3 – Tub Seats:
Seats should be mounted to wall surface securely and shall not slip during use.

4.4.1 Protruding Objects:
Objects with their leading edges between 27" and 80" (685 mm and 2030 mm) above the finished floor shall protrude no more than 4" (100 mm) into walks, halls, corridors, passageways, or aisles. Objects mounted with their leading edges at or below 27" (685 mm) above the finished floor may protrude any amount. Free-standing objects mounted on posts or pylons may overhang 12" (305 mm) maximum from 27" to 80" (685 mm to 2030 mm) above the finished floor. Protruding objects shall not reduce the clear width of an accessible route or maneuvering space.

SOAP DISPENSERS

U125 Shown

Series Overview

AJW soap dispensers come in a variety of designs, soap capacities and finishes. To adhere to ADA guidelines designated manual soap dispensers can be operated with one hand and less than 5 lbs of force or less. We also offer hands-free, battery operated automatic dispensers.

Replacement Valves

We offer replacement valves for our soap dispensers. Refer to the chart below.

Valve	Soap Dispenser
U001U-TAP	U130, U130A
U001-P25	U120, U122, U124, U126, U125

Care & Cleaning

All soap tanks, valves, and globes must be cleaned periodically to avoid sludge and soap build up. This is important since the majority of operational issues for soap dispensers are due to improper maintenance and lack of cleaning. While cleaning, do not remove or take valves apart as this creates problems with the seals and may cause a bypass leak.

Flush valves with warm water. If the water does not flow through the valve after cleaning, repeat the procedure.

Make sure you are using the right soap in your dispensers. The proper viscosity is imperative for trouble free operation.

TOWEL & WASTE COMBINATIONS

Series Overview

AJW towel and waste combination units are space efficient and, when properly installed, adhere to ADA guidelines for accessibility. Products in this series can be fitted with collars for surface mounting or semi-recessing.

Uni-Door™

All Uni-Door™ cabinets feature seamless one-piece 18 gauge door construction. Half inch returns provide maximum strength and rigidity.

Collars

Collars are available for all AJW cabinets wherever walls do not permit full recessing. Collars can be installed in the field after cabinet has been shipped to the job location. Collars are available in 2” increments.

See page 16 for mounting guide.

MIRRORS & SHELVES

Series Overview

AJW mirrors are available in a variety of sizes and mirror surfaces. Contact your Customer Relationship Manager for more information. Shelves can be fabricated to meet many custom requirements for length or depth.

Warranty

We guarantee our mirrors against silver spoilage for a period of fifteen years under normal use. All mirrors are silver coated and sealed with an electrolytic copper plating. This guarantee includes all 1/4" plate glass mirrors including tempered, laminated, and all other safety glass mirrors.

Mirror Images

Plate glass and vinyl clad plate glass mirrors provide the best reflective quality. Stainless steel mirrors have a slight distortion which increases proportionally with mirror size.

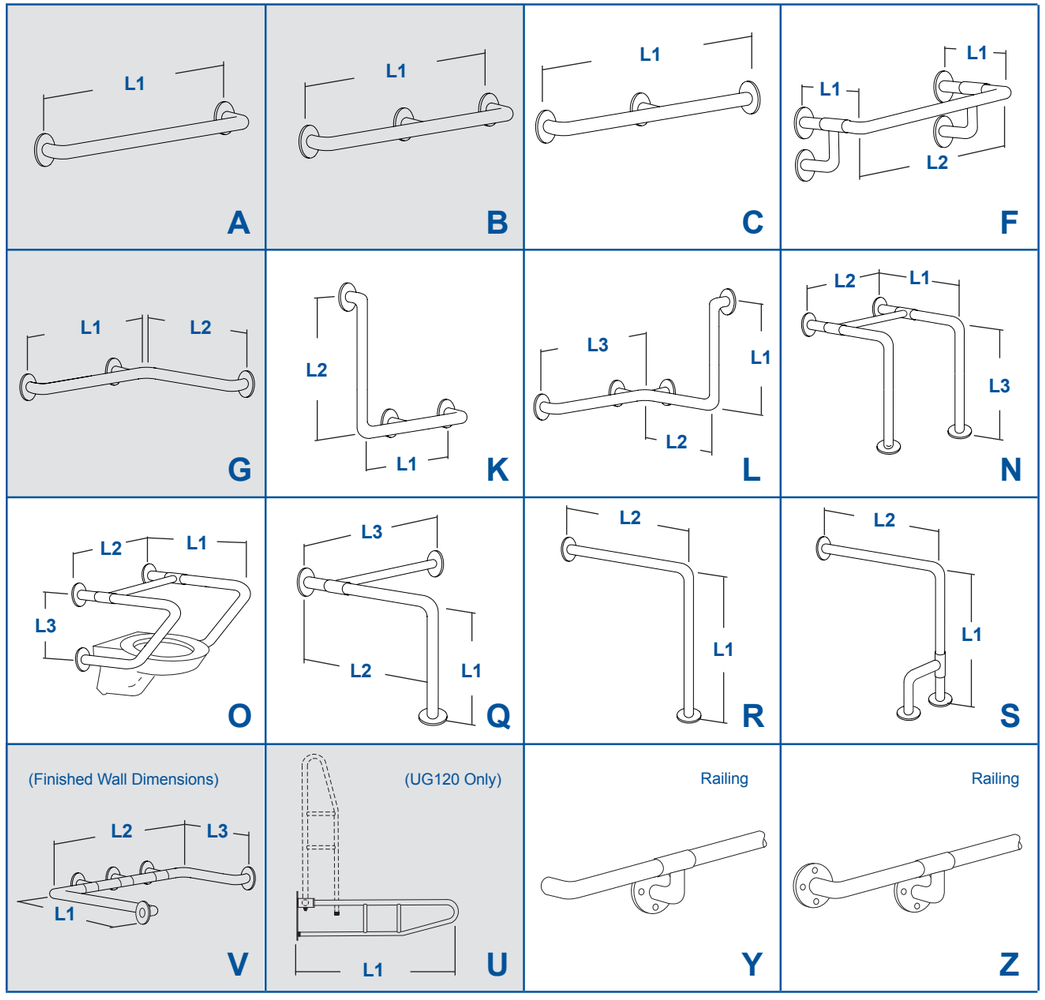
Configuration Guide



Standard Configurations

BP10 | In Wall Mounting Plate

One plate is required per side of grab bar. (ex. Configuration-G: requires 2 plates)

To determine plate size add 6” to length of grab bar (ex. 12” grab bar requires 18” mounting plate).

Other kits are available for wood, drywall, masonry and partition installation.

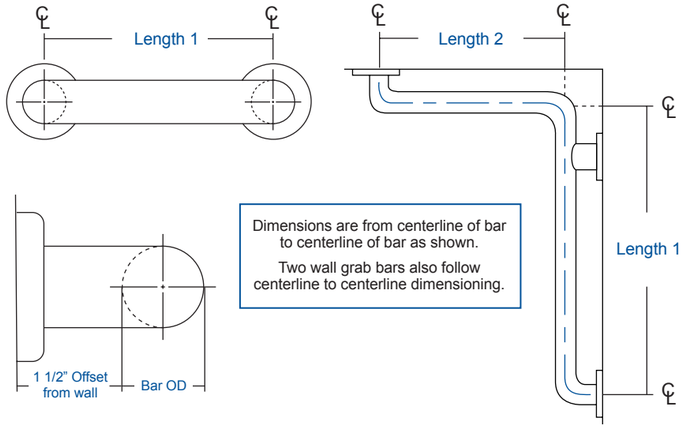
Measurement Guide

Wall Clearance:
This is commonly known as bar offset. All AJW bars have 1 1/2” clearance between the mounting surface and inside of the bar with the exception of wall to floor bars. (Complies with Federal specification WW-p-541/8b)

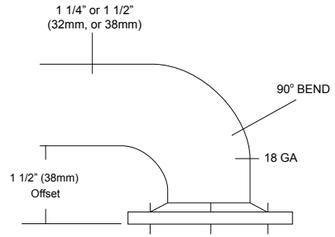
Sizing Bars:
All stainless steel grab bars are measured centerline to centerline. Three sided bars (ex: Configuration-V) must have finished wall sizes supplied when pricing and ordering bars.

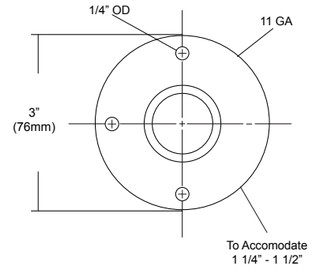


Dimensions are from centerline of bar to centerline of bar as shown.

Two wall grab bars also follow centerline to centerline dimensioning.

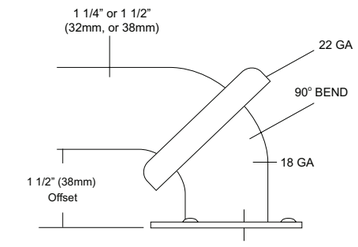
Flange Types

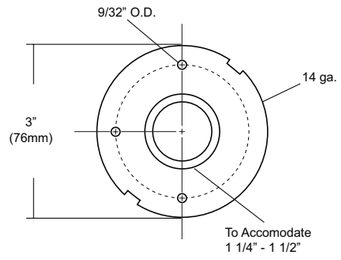




Exposed Flange

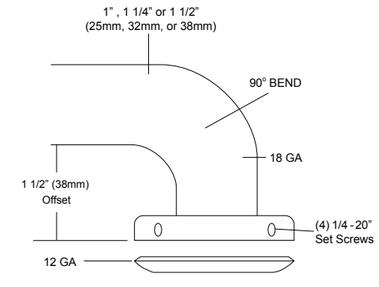
3” O.D. 11 gauge 4 satin finish stainless steel with three (3) mounting points (for 1/4” dia fasteners). Flange is TIG welded to bar for one-piece construction.

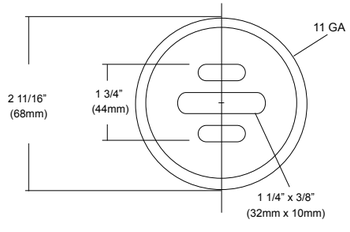




Concealed Snap Flange

3” O.D. deep drawn, 22 gauge stainless steel cover with a satin finish. A 12 gauge stainless steel mounting plate is welded to the bar with 3 (three) mounting points.





Concealed Set Screw Flange

3” O.D. deep drawn 11 gauge satin finish stainless steel. 12 gauge tennon plate. Flange is secured to plate by means of four (4) 1/4 - 20 stainless steel tamper resistant set screws.

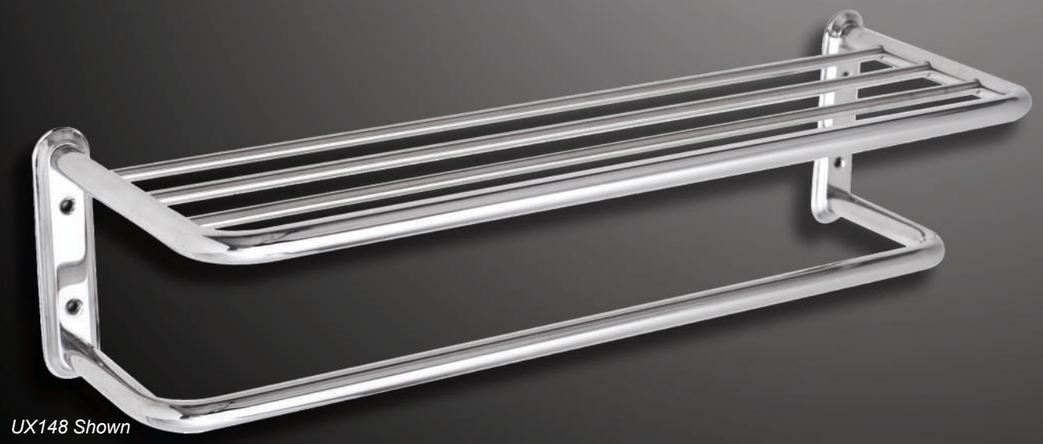
HOSPITALITY ACCESSORIES



UX148 Shown

Series Overview

Hospitality accessories are fabricated with design and aesthetics in mind. See below for an overview of each series.

UB Accessories: Fabricated of a solid brass casting with a chrome, nickel plated finish.

UC Accessories: Fabricated of high polished chrome plating over virgin zinc cast (Zamac). All accessories meet standard Federal specifications.

UX Accessories: All accessories are stainless steel with a bright or satin finish and provided with a concealed stainless steel mounting plate. When specifying the finish use suffix -BF for a bright or -SF for a satin finish.

Shower Rods & Flanges

Use this guide to specify shower rods. Each rod diameter requires the appropriate flange. Flanges can be specified alone using their diameter and flange type. Shower rods are only available with a satin finish.
